Abdourahman Barkad Robleh

Full Stack Engineer

WHO I AM

Abdourahman Barkad Robleh

Full Stack Developer | CS Graduate

 Djibouti

 B.S. Computer Science

Professional Profile

"I am a Computer Science graduate and Full Stack Developer passionate about designing and developing modern, scalable, and user-friendly web applications. I enjoy transforming ideas and real-world problems into practical digital solutions.

My experience includes developing business management systems, monitoring and evaluation platforms, dashboards, portfolio websites, and e-commerce solutions. I continuously develop my technical knowledge while improving my problem-solving, communication, and teamwork skills."

Full Stack Apps

NGO Systems

Problem Solving

PROFESSIONAL JOURNEY

Step 01

Computer Science

Bachelor's Degree in CS, mastering foundational algorithms & database design.

Step 02

Web Development

Building responsive, intuitive client interfaces with modern HTML, CSS & JS.

Step 03

Full Stack Engineering

Connecting front-end applications with secure back-end APIs & databases.

Step 04

Business & NGO Systems

Engineering M&E platforms, management tools, and e-commerce software.

Step 05

Professional Growth

Continuously expanding expertise in cloud architecture, AI, and enterprise tech.

TECHNICAL EXPERTISE

Programming Languages

JavaScript
(ES6+)

Proficient

Python

Skilled

WHAT I CAN BUILD

Full Stack Web Development

Building complete web applications from modern front-end user interfaces to robust back-end systems.

Business Management Systems

Developing digital management platforms that streamline organization operations, users, and resources.

NGO & M&E Platforms

Creating monitoring, evaluation, indicator tracking, activity reporting, and budget systems for humanitarian organizations.

Interactive Dashboards

Creating visual dashboards that transform complex raw data into actionable statistical insights.

Database Solutions

Designing structured, scalable relational databases with optimized queries and data integrity.

E-Commerce Solutions

Developing online commerce portals with product catalogs, shopping carts, vendor dashboards, and checkout systems.

SELECTED PROJECTS

crs-me.org

Base Central CRCS

Indicators | Budgets | Reports

M&E System

Base Central CRCS

Monitoring & evaluation platform for Croissant Rouge de Djibouti.

LaravelMySQLBootstrap

djibouti-store.com

Djibouti E-Commerce

Multi-vendor marketplace & cart

E-Commerce

Djibouti E-Commerce

Online marketplace for local vendors, products, and customer orders.

PHPJavaScriptMySQL

iftin-english.edu

Iftin Private School

Educational platform & web resources

Education Platform

Iftin School Website

Educational digital work and website for English-learning center.

Web DevUI/UX

CASE STUDY: BASE CENTRAL CRCS

NGO Digital Solution

Red Cross / CRCS

Monitoring & Evaluation System

Custom monitoring platform designed for Croissant Rouge de Djibouti to manage organizational projects, track indicators, and generate budget reports.

Key System Features:

- ✓ Project Management
- ✓ Department Tracking
- ✓ Activity Log
- ✓ Indicator Monitoring
- ✓ Budget & Expenditure
- ✓ Zone & Beneficiaries

TECHNOLOGY STACK:

Laravel

PHP

MySQL

Bootstrap

Digital Marketplace

Djibouti E-Commerce Platform

Digital marketplace solution designed to empower local businesses and vendors in Djibouti with online store management and customer order tracking.

Core Platform Modules:

- > Product Catalog & Category Hierarchy
- > Vendor Management & Vendor Dashboards
- > Shopping Cart & Checkout Workflow
- > Customer Accounts & Order History
- > Admin Control Panel & Metrics

TECHNOLOGY STACK:

- PHP
- JavaScript
- MySQL
- CSS3

PERSONAL PORTFOLIO WEBSITE

 DIGITAL BRANDING PLATFORM

Personal Developer Showcase

A clean, modern personal portfolio website built to showcase my technical skills, software projects, case studies, and services to international recruiters and business clients.

HOW I BUILD

01 — DISCOVER

Requirements & Vision

Understand client objectives, analyze target end-users, and clarify core system specifications.

02 — PLAN

Architecture & Schema

Define application architecture, relational database tables, API routes, and tech stack choices.

03 — DESIGN

UI/UX Prototyping

Create clean, intuitive layouts and user workflows focused on usability and efficiency.

04 — DEVELOP

Full Stack Coding

Write clean, modular code across front-end components, back-end logic, and database layer.

05 — TEST

Quality & Security

Identify edge cases, optimize query performance, verify security protocols, and fix bugs.

06 — DEPLOY & IMPROVE

Launch & Evolution

Deploy solution onto production servers and continuously monitor, refine, and upgrade functionality.

HOW I THINK AS A DEVELOPER

Clean Code

Write readable, maintainable, and well-structured code adhering to industry standards and best practices.

User-Centered Design

Build software around real user workflows, prioritizing simplicity, clarity, and ease of navigation.

Analytical Problem Solving

Break down complex business logic into manageable components and engineer practical digital solutions.

Continuous Learning

Actively adopt modern frameworks, tools, and paradigms to remain at the forefront of tech trends.

Security & Reliability

Develop applications with robust data protection, validation checks, and resilient system uptime.

System Scalability

Architect database schemas and application components that can grow alongside expanding organizational requirements.

EDUCATION & DEVELOPMENT

 BACHELOR'S DEGREE

Computer Science

Académie des Sciences et Technologies Industrielles

 Djibouti

Core Academic Disciplines:

- ✓ Software Engineering
- ✓ Database Systems
- ✓ Computer Networks
- ✓ Web Applications
- ✓ Algorithms & Data Structures
- ✓ Information Technology

 Rigorous grounding in computer science principles and software engineering practices.

 CONTINUOUS LEARNING

Technical Self-Improvement

Full Stack Frameworks

Laravel, Node.js, ASP.NET

Cloud & DevOps Concepts

Deployment, hosting & databases

AI & Modern Web Tools

AI developer workflows & UI/UX

** Verified certificate details available upon request.*

BEYOND CODING

Clear Communication

Ability to translate complex technical concepts into clear, actionable ideas for non-technical stakeholders.

Teaching & Instruction

Experience teaching English and crafting educational learning materials for diverse student groups.

Cross-Functional Teamwork

Collaborating seamlessly with designers, managers, and clients to achieve shared project goals.

Agile Adaptability

Rapidly learning new technology stacks and adapting to evolving organization requirements.

Project Organization

Planning development milestones, managing tasks systematically, and delivering projects on schedule.

Pragmatic Problem Solving

Analyzing business pain points and engineering practical, efficient software solutions.

MY CAREER VISION

“

"My goal is to become an expert Full Stack Developer and Software Engineer capable of designing reliable, scalable, and impactful digital solutions."

SHORT TERM

Engineering Contribution

Strengthen full-stack development skills and contribute to impactful software projects in business and NGO sectors.

MEDIUM TERM

Software Architecture

Become an advanced Full Stack Developer capable of architecting end-to-end enterprise systems from scratch.

LONG TERM

Digital Transformation

Build innovative digital products that create meaningful value for businesses, communities, and international organizations.

LET'S BUILD SOMETHING GREAT
